Proposal# 201005, Phased Allocation Program in .JOBS

Dear Ray,

ICANN has conducted a review of EmployMedia's proposed introduction of a Phased Allocation Program in .JOBS in accordance with the Registry Services Evaluation Policy and process set forth at <http://www.icann.org/registries/rsep/rsep.html>.

Based on the information provided, ICANN has not identified any significant competition or security and stability issues. As noted in the proposal, the proposed modification requires an amendment to the .JOBS Registry Agreement (signed 5 May 2005). The amendment will be published for public comment for further consideration.

Patrick
