Krista Papac
ICANN

[Sent via EMAIL]

Dear Krista:

I would like to remedy the lack of Latin IDN tables for the .ink TLD and request that you add those to the RSEP currently posted on the ICANN site under "ICANN Review," ticket #A0N4K-5L7K8.

This oversight was raised to our attention by your team and after directly interfacing with you we believe that the omission of the Latin IDN table was a contract oversight that should have been caught by either of our teams. Given that we have the above IDN related RSEP currently open, we should bundle these requests. As you know, I am not currently able to directly edit the request given its status as in "ICANN Review." I trust that this letter can serve that purpose.

With thanks,

Raymond King
